

REACH THE WORLD

Bringing the World into Classrooms

Dear Educators,

In this document, we have compiled a Starter Pack of activities that are designed to get your classroom started on their journey as part of the [Endurance22 Expedition to Antarctica](#), which you can access via the [Reach the World website](#). Please see the table below for an outline on which activities to use alongside select expedition content.

Expedition Content	Activity
Journal : “An Expedition 100+ Years in The Making”	Kahoot Quiz!
Journal : “Putting (Very) Smart Buoys to Work” Album : “Livestream with Dr. Tamaryn Morris and Thomas Mtonsi (Recorded)”	“Environments Around Us Activity”
Livestream Video Call : “Pack Your Bags with Reach the World Explorer Tim Jacob!”	“Pack your Bags Activity”

As with all of our learning resources, we intentionally included each resource in Google Doc and PDF format so that you may adapt or re-purpose them as you see fit for your students. If you would like to make changes to one of the activity sheets, please make your own copy by opening the doc, then clicking “file” then “make a copy”.

We at Reach the World would love to see how you are using our content! Please share how you have adapted these resources and integrated these RTW articles by using the email address below and we will feature our favorites in future emails.

If you have any questions about using or adapting these writing activities for your class, please reach out to educators@reachtheworld.org.

Sincerely,
Reach the World Staff
