Lunch on A Ship

Directions: You're the head chef onboard the S.A. Agulhas II. For lunch, you are serving creamy garlic mussels for 105 passengers but your recipe only serves 5 people. Use your knowledge on proportions to make enough food for all passengers.

1) Your recipe only serves 5 people. What should you multiply each ingredient by in order to make enough for 105 passengers? Show your work.

2) Use the conversion factor calculated in question 1 to convert create a recipe that will feed all 105 passengers. Show your work
